Note	When connecting the signal lines to the black PCB terminal blocks, please use a 0.4 x 2.0 mm screwdriver.

#### Technical data

#### General

The black PCB terminal blocks only require a minimal amount of operating force.  Screwdriver: SZS 0,4X2,0 - 1205202  Using larger screwdrivers or excessive force may damage the PCB terminal blocks.  When using ferrules, the wires can be inserted straight into the PCB terminal blocks without opening the clamping area.
NOTE: Observe the permissible bending radii when laying conductors, since the degree of protection may be put in jeopardy if the bending forces are too high. Alleviate mechanical loads upstream of the connector, e.g. by using cable ties.
Unused slots are to be sealed off prior to commissioning. Suitable sealing elements are to be found under "Accessories".
